

My Baby's Got Good Timing

Shakedown Records SD251

Based on the song by Dan Seals

Words and Music by Bob McDill and Dan Seals

Opener & Figures:

Circle Left: I was lost and all alone. An empty heart without a home. **Men star right** go one time and then **left allemande** and **weave** that ring. My baby's got good timing. Don't know how but she reads my mind and there's just one way to describe it. My baby's got good timing.

Figures (Twice for heads, twice for sides):

Heads (Sides) Touch $\frac{1}{4}$, then you **walk and dodge**. **Pass the ocean** now, then **single hinge**. Coordinate, walkin' down tonight. You **bend the line, pass thru, wheel and deal**. **Centers pass thru, swing thru** he said. **Boys trade, swing** your girl all **promenade**. There's just one way to describe it. My baby's got good timing.

Middle Break:

Circle left. Every time I'm feelin' down. When the world closes in somehow. **Men star right** go one time and then **left allemande** and **weave** that ring. My baby's got good timing. Don't know how but she reads my mind and there's just one way to describe it. My baby's got good timing.

Closer:

Sides face **Grand Square**. My baby's got good timing. Don't know how but she reads my mind and there's just one way to describe it. My baby's got good timing. **Allemande left** and **weave**. My baby's got good timing. Don't know how but she reads my mind and there's just one way to describe it. My baby's got good timing.

Original Lyrics

Verse 1

I was lost and all alone. An empty heart without a home. Just at the time when I needed a friend she came along and she took me in.

Verse 2

(And) every time I'm feelin' down. When the world closes in somehow. Just at the moment when I need her most she comes to me and she holds me close.

Chorus

My baby's got good timing. Don't know how but she reads my mind and there's just one way to describe it. My baby's got good timing.

Verse 3

In the night when the world is quiet and she's lyin' here by my side. When it's her sweet love I need, that's the moment when she comes to me.
